

Successfully manage and grow your business

The SAP® Business One application offers an affordable way to manage your entire business – from accounting and financials, purchasing, inventory, sales and customer relationships, and project management, to operations and human resources. SAP Business One helps you to streamline processes, gain a greater insight into your business, so that you can act fast and make decisions based on real time information, to help you drive profitable growth.

A single view of your business to help you stay in control

We understand that businesses like yours have big dreams and big goals, and as your business grows it can be difficult to get a single view of what is happening at any given time, when information resides in different applications or even locations. SAP Business One is designed for small and mid-sized companies to grow with you, it is flexible, modular, yet powerful and with its user-friendly interface, it is simple to use.

SAP Business One

A complete and customizable solution

SAP Business One is a single, integrated solution that provides clear visibility into your entire business and complete control over every aspect of your operations. It captures all critical business information for immediate access and use company-wide. Unlike accounting packages and spreadsheets, it delivers what you need to manage your key business areas.

Because every business is different, SAP Business One is designed with flexibility in mind. Whether it's deployed on premise or in the cloud, you can access SAP Business One at anytime, anywhere via any mobile device. And because SAP Business One runs on both the SAP HANA® and Microsoft SQL server platforms, you can choose the one that suits your business best.

What's more, your employees can start using it from day one. As your business grows, you can customize and extend SAP Business One to meet your evolving needs.

Do you want to grow your business overseas? SAP Business One supports 27 languages and 43 country-specific versions, delivered and supported locally by our extensive network of over 700 SAP Business One partners.

Empower your people to make smart decisions faster

SAP Business One empowers your employees to make smart, confident decisions, faster by capturing all critical information across sales, customers, operations, and finance – making it instantly available company-wide. By integrating this data in one system instead of multiple disconnected spreadsheets, it eliminates duplicate data entry, costs, and related errors. Workflow-based alerts trigger automatic responses when important business events occur, allowing you to focus on the most critical events. You have clear visibility into how your business is performing and greater confidence in the information used to make decisions.

Analytics and reporting

Together with the fully integrated SAP Crystal Reports for SAP Business One you can create dashboards and reports that provide insight into all business areas. Intuitive, interactive drill-down functionality helps you get answers to your most pressing questions. Employees can address customer needs faster, and managers can accurately track revenues, costs, and cash flow to assess performance and take quick corrective action.

For even faster information access, the SAP HANA version for SAP Business One provides powerful analytics in real time, making it easier for users to search SAP Business One for the information you need and create standard or ad hoc reports in a moment.

Find an industry-specific solution for your expanding business

Take advantage of the extensive industry functionality, best practices, and processes built into SAP Business One. And as your business grows, you can extend SAP Business One to meet your specific business and industry challenges using the SAP Business One studio, software development kit, or any of over 500 add-on solutions built by our partners.
