

Cloud Backup for Exchange Online

Data loss happens, even in the cloud!

75% of data loss is due to people deleting content accidentally or intentionally. Deleted items in Office 365 will be permanently removed after a maximum of 30 days. Extended Office 365 licenses and features offer unlimited retention, but don't provide a fast, easy way to restore content exactly as it was and where it was so employees can get back on track quickly.

Our Office 365 Cloud Backup is a simple solution that protects your data and productivity across the Office 365 tenant.

Why would you need it?

People delete data. Mostly accidentally, sometimes intentionally. Not to mention the ever-present threat of ransomware or other malware. So you need to ensure you have safeguards in place to protect all of your valuable business data; including your Exchange Online information.

Office 365 Archiving is not a substitute for backup...

Office 365 offers license-dependent data protection features including Archiving, In-Place Hold and Litigation Hold.

These features are designed for compliance and litigation, not for quick search and restore of lost data.

Even with Office 365 Enterprise E3 licenses across your organisation, and all policies set to optimise data protection, only a backup solution gets employees back on track quickly with minimal skill, time and cost.

FEATURE	Office 365 ¹	Cloud Backup
Granular backups of email	✓	✓
Designed for restoring data	✗	✓
One-click restore	✗	✓
Restores directly to the mailbox	✗	✓
Maintains mailbox folder structure	✗	✓
