## VIPRE Email Security Phishing Protection

Protect your organisation from malicious URLs hidden in emails

**VIPRE Email Security Phishing Protection (ClickSweep) provides another level of defence against phishing and ransomware attacks by protecting email recipients from clicking on dangerous URLs. It rewrites URLs in emails, enabling them to be rescanned at the time of the click.**

### Why you need it

A common zero-day attack scenario sees seemingly innocent emails containing web links pass through spam and virus filters. These emails are delivered to the intended recipient as they do not pose a threat. However, after a brief period, the web link contained in the email becomes “weaponised” and is pointed to a phishing site or to a website which can download malicious content to your computer.

This subjects the recipient and their network to phishing, ransomware, or other malicious attacks.

**VIPRE Email Security Phishing Protection (ClickSweep)** protects the user from clicking on these malicious links; thus ensuring the security of your network.

### Vipre's cloud-based service portfolio

Email Security

Email Continuity

Malicious URL Protection

Email Encryption

Email Archiving

Web Security

Endpoint Protection

### Quick facts

- Scans URLs in emails
- Re-writes all web links in emails
- Blocks URLs which could lead to phishing, spear phishing, spoofing and ransomware attacks
- Customisable warning and block pages
- Easy statistics report scheduling
- Reduces security risks
- Requires **MailSweep** or **Email Security Cloud**

## VIPRE Email Security Phishing Protection (ClickSweep)

Working in conjunction with our cloud email security solution, **Email Security Phishing Protection** examines clean email messages for web links and replaces these links with a custom URL back to the phishing protection service. The email is then sent on to the recipient.

If the original message or web link is now considered to be malicious, the user is warned of the risk, or blocked entirely from accessing the web page referenced by the URL.

Call us on 01905 758 900 to enable **ClickSweep** on your account.

### About VIPRE Security®

VIPRE is a leading provider of Internet security solutions purpose-built to protect businesses, solution providers, and home users from costly and malicious cyber threats. With over twenty years of industry expertise, VIPRE is one of the world's largest threat intelligence clouds, delivering protection against today's most aggressive online threats.

Our robust portfolio includes comprehensive endpoint and email security, along with threat intelligence for real-time malware analysis. VIPRE delivers easy-to-use, comprehensive, layered defence through cloud-based and server security, with mobile interfaces that enable fast threat response.

VIPRE® is a brand of the j2 Cloud Services division of j2 Global, Inc.
